

Launch

\$199 one-time setup · \$199/month

Get found on Google.

We manage the essential parts of your Google presence so customers can find your business, see a professional profile, and have more opportunities to contact you.

1. Google Business Profile

We set up and optimize your Google Business Profile.

Business information, category, services, description, photos, hours, and website — accurate, complete, and professionally presented.

2. 5 Google Searches Monitored

We track 5 important searches customers use to find businesses like yours.

For example: “plumber near me,” “plumber in Lincoln Park,” or “emergency plumber.” We monitor how your visibility changes over time.

3. 2 Google Posts Every Month

We create and publish 2 posts each month on your Google Business Profile.

Services, helpful information, seasonal topics, promotions — reasons to choose your business.

4. 1 Special Offer Every Month

We create 1 customer-focused offer each month.

A first-visit discount, seasonal promotion, or service special designed to encourage customers to contact you.

5. Automatic Review Requests

We help you consistently ask customers for Google reviews — powered by your AI voice subscription.

After a customer does business with you, an automated request encourages them to share their experience on Google. Powered by our AI voice service — requires an active AI receptionist subscription (any plan). If you have one, this runs automatically; if not, we'll help you add the Starter plan.

6. Review Monitoring

We monitor your new Google reviews.

Positive reviews don't go unnoticed, and potential issues get identified quickly.

7. Basic Analytics Dashboard

You get a simple view of your Google performance.

Search visibility, keyword performance, reviews and review growth, posts, and other Google activity.

8. Monthly Performance Report

We explain what happened each month in plain English.

Work completed, changes in your Google presence, review activity, and what we plan to focus on next.

What this means for you

You don't have to manage Google yourself. We handle the ongoing work that keeps your Google presence accurate, active, and monitored — with a clear view of what we're doing each month.

INCLUDED — LAUNCH

Google Business Profile setup & optimization	✓
Google searches monitored	5
Google posts	2/month
Special offers	1/month
Automated review requests	w/ AI voice plan
Review monitoring	✓
